PROFESSIONAL EXPERIENCE

Technical Support

Smart Energy 2022 - 2023

Internship at Smart Energy, where I provided technical support to internal teams and end users. I gained hands-on experience in both front-end and back-end development, contributing to the design, implementation, and troubleshooting of web applications.

COURSES & MASTERCLASS

Responsive Web Design

Completed the Responsive Web Design course at freeCodeCamp, covering the fundamentals of HTML and CSS. The program emphasized building accessible and user-friendly web pages, applying responsive layouts with Flexbox and CSS Grid, and ensuring compatibility across different devices and screen sizes.

JavaScript Algorithms and Data Structures

I'm currently doing the JavaScript Algorithms and Data Structures course on freeCodeCamp. This program focuses on mastering core concepts of JavaScript, including array and object manipulation, recursion, functional programming, and implementing algorithms like search and sort.
